The Eurocode is a small, lightweight, user friendly Hot Foil Coding attachment typically used for overprinting text (batch and lot code information, expiry and use by dates, price marking) as well as simple graphics in any colour, on to flexible packaging materials at speeds of up to 700 cycles per minute. Prints are clear, dry, non-toxic, and are of a quality that cannot be matched by any other on-line printing process.

## INSTALLATION DETAILS

## MOUNTING FRAME

The optional Eurocode mounting frame is the basis for most installations. It can be supplied in a standard form or ready adapted to suit specific host machinery.

## CONTROL UNIT

The Eurocode's digital display controller enables simple yet precise control of print dwell times and operating temperatures to provide the optimum print quality. It features indicators for end of foil, open door, heater failure and temperature sensor failure.
